

j-me®
original design

about us

j-me is a global product design company, that has become known for producing original home products that have a sense of humour and a love of design. located in the creative hub of london's oxo tower, j-me has a unique ethos that results in a range of functional products that are original and fun.

j-me was founded by brothers jamie and mark in 2000 with a desire to create original and entertaining products for the design-conscious home owner. with both jamie & mark's entrepreneurial spirit and passion for design (they studied at central saint martins, the world's leading centre for art and design education), the brothers launched j-me original design in their late twenties.

with humble beginnings, they started the company whilst living together at their parents' home in north london. mum's lounge was often transformed into a picking and packing operation.

by 2007 j-me had not only won 2 coveted design awards, but had also successfully exported the brand globally and moved into a prestigious new design studio in london's oxo tower.

j-me's core values are as clear now as when they first started out and are what make the products unique. all products are 100% original design, always with a twist of humour and focus on superior function and high quality.
